APPENDIX M

The state of knowledge on the effect of microflora upon the host was surveyed by a literature search conducted throughout the program. Emphasis was given to the intestinal microflora and away from classic infection patterns. Approximately 2,000 references have been collected into the attached bibliography. These have been used to provide background and specific references for this report. In addition to the usual sources for materials in the field of microbiological ecology and intestinal microflora, special notice must be taken of the generosity of Dr. B. Gustafsson of the Department of Germfree Research, Karolinska Institute in Stockholm, Sweden. Dr. Gustafsson supplied us with his complete bibliography.

1. Abrams, G. D., 1963 Influence of the normal flora on mucosal morphology and cellular renewal in the ileum, American Institute for Biological Sciences Symposium, Washington, D.C., 12.
2. Abrams, G. D., 1965 Normal flora and leudocyte mobilization, Arch. Path. 79: 213-7.
3. Abrams, G. D., 1967 Effect of the normal microbial flora on gastrointestinal mobility, Proc. Soc. Exp. Biol. Med., 126 301-4.
4. Abrams, G. D., H. Bauer and H. Sprinz, 1963 Influence of the normal flora on mucosal morphology and cellular renewal in the ileum. A comparison of germfree and conventional mice. Lab. Invest., 12: 355-364.
5. Abrams, G. D., J. E. Bishop, H. D. Appelman, and A. J. French, 1960 Development of a laboratory for germfree research in the department of pathology. Univ. of Mich. Med. Bull., 26: 165-175.
6. Abrams, G. D. and Bishop, J. E., 1961 Germfree techniques in experimental pathology. A survey of the morphologic changes in, and the research potential of, the germ-free guinea pig. Univ. Mich. Med. Bull., 27: 136-147.
7. Abrams, G. D., and J. E. Bishop, 1966 Effect of the normal microbial flora on the resistance of the small intestine to infection, J. Bact., 92: 1604-8.
8. Adame, R. J., Stanmeyer, W. R., 1960 Effects of prolonged antarttic isolation on oral and intestinal bacteria. Oral. Surg., 13: 117-20.
9. Ahmadjian, V., J. T. Reynolds, 1961 Production of biologically active compounds by isolated lichenized fungi. Science, 133: 700-1.
10. Aizawa, D., B. Kobo, T. Toshioka and Y. Suzuki, 1965 Bacteriotherapy and bacterio-prophylaxis against infectious by the use of lactic acid bacteria. I. Historical review of the literature: an introduction to studies on the biological significance of living cells and the products of lactic acid bacteria in the intestine. Nihou Univ. J. Med., 7: 243-257.
